

Itay Hovav

About me

I believe curiosity is one of my defining traits. I enjoy learning new things, asking questions, and continuously expanding my perspective. I'm drawn to unfamiliar challenges and enjoy figuring things out from the ground up. In my free time, I enjoy archaeology, scuba diving, cooking, and hiking.

Professional Experience

Verification Engineer at NVIDIA (2024 - present)

Develop and maintain verification environment for high-performance networking chip

Projects

Edge-AI Traffic Violation Detection

- Real-time parking violation detection on Jetson Orin Nano
- DeepStream pipeline with optimized inference for embedded deployment

Edge-AI Wildfire Detection

- Real-time wildfire detection on Jetson Orin Nano
- Optimized inference performance for low-power deployment scenarios
- Awarded 2nd place in the international SD Express Student Challenge

Education History

Student of Electrical Engineering

Institution: Technion - Israel Institute of Technology

GPA: 92

Specialization Areas:

- Quantum Technologies
- Signal Processing
- Machine learning

Military service

Intelligence analyst (2018 - 2020)

Worked in the technical division of the research department in IDI, analyzing multiple information sources using analytical tools. Collaborated with international partners and developed strong analytical and teamwork skills.

Operations specialist (2020 - 2021 permanent service) -

Managed operational activities within a research department section. Required problem-solving, creativity, teamwork, communication, and effective performance under pressure.
